Safety and Cleaning Instructions for the LIINI® Pacifier

Dear Customer,

Thank you for choosing our pacifier. We place great importance on your safety and the well-being of your family.

To ensure that you can use the pacifier safely, it is important to carefully follow the safety and cleaning instructions below. **Improper use can pose serious risks!**

Handling & General Information

We have deliberately chosen not to include printed instructions and instead provide all information digitally—this ensures it is always up to date while also helping to protect the environment.

Please take a moment to read these instructions. Proper use ensures that your baby **can safely use the pacifier at all times and that you will enjoy the product for a long time.**

General Safety Instructions (GPSR)

Your baby's safety is our top priority. Please read the following instructions carefully and keep this manual for future reference.

- The LIINI pacifier must be used exclusively for soothing and for its intended purpose.
- Use the pacifier only **under adult supervision**.
- Carefully inspect the pacifier, and especially the nipple, for damage, cracks, discoloration, or material changes before each use.
- Pull the nipple apart in all directions before each use to **detect any potential weak spots early on**.
- Do not continue to use the pacifier **if damage is visible**.
- **Replace** the nipple **at least once a month** for hygiene and safety reasons.
- **Keep** individual components and replacement parts **out of the reach of children**.
- The pacifier is not a toy and must not be attached to strings, ribbons, or loose clothing—**strangulation hazard**.
- Use only original LIINI replacement mouthpieces and accessories.
- Before each use, check that all components are correctly assembled and securely fastened.
- The safety lock **must** be **fully and firmly closed** to ensure the mouthpiece remains securely in place.
- **Boil** the pacifier and the **nipple thoroughly before first use**.
- Clean the pacifier regularly according to the instructions and do not use harsh or abrasive cleaning agents.
- Do not expose the pacifier to direct sunlight or excessive heat, as this can damage the material and impair its function.
- Never dip the nipple in sweet liquids or medication—this can cause **tooth decay**.
- Prolonged or intensive use of pacifiers can affect natural tooth and jaw development. Experts therefore recommend using pacifiers in a mindful and age-appropriate manner.
- The LIINI pacifier has been **tested** in accordance with the **European safety standard EN 1400**.

Improper cleaning can not only compromise the hygiene and function of your baby bottle, but also **endanger your baby's health and safety**.

How to take the pacifier apart and put it back together

You can find detailed step-by-step instructions for the pacifier by scanning the QR code below.

Check before each use

Carefully inspect the LIINI pacifier before each use and ensure that all components are correctly assembled, firmly in place, and securely closed.

Check in particular:

- whether the mouthpiece is correctly inserted
- that the child safety lock is fully secured
- whether the screw cap is tightly closed
- that no parts can come loose or move

If individual components come loose, there is a risk of choking or suffocation. Do not continue to use the pacifier under any circumstances in this case.

The LIINI pacifier is not suitable for children who are already cognitively and motorically capable of opening the pacifier on their own or removing individual parts. As soon as a child can open the pacifier on their own, it must no longer be used.

Replace the mouthpiece regularly

The mouthpiece is a hygienic wear part and comes into daily contact with saliva, pressure, and mechanical stress. Regular use can lead to material fatigue, fine cracks, or changes in the silicone surface, which are not always immediately visible to the naked eye.

For hygiene and safety reasons, we therefore recommend replacing the mouthpiece at least once a month—even if no visible damage is apparent.

Additionally, carefully inspect the mouthpiece before each use for:

- Cracks or fine damage
- Material changes or discoloration
- Sticky or porous areas
- Deformations or stretched material
- Gently pull the mouthpiece apart in all directions before each use to identify any potential weak spots early on.
